NEWSLETTER Spring 2007

News from the President

Please encourage all eligible veterinary microbiologists to register to take the ACVM board examination this fall. The deadline for application is April 30. All of the necessary information for applying can be found on the ACVM website at: <http://www.acvm.us/> I would be happy to speak to any candidates who are considering applying to take the examination. They could contact me at 515-294-8459, or jroth@iastate.edu. If you send me their contact information, I will call them to answer their questions and encourage them to apply.

Dr. Brenda Love and the examination committee are working hard to revitalize the examination process. They plan to engage in the following efforts in an attempt to raise the success rate:

1. Improve the overall quality and relevance of the exam.
2. Provide a detailed study guide with example questions taken from the exam bank.
3. Provide information to each candidate on recommended examination strategies (e.g. single-exam success rate versus multiple-exam success rate).
4. Establish a mentoring program so that all candidates have a Diplomate available to provide information about the examination process.

Recruiting new ACVM Diplomates is essential for the

future of our organization, and to fill the increasing national need for veterinary infectious disease experts in teaching, diagnostics, research, and public policy.

Best regards,
Jim Roth

News

ABVS Meeting Chicago, IL

On February 26, 2007, Brenda Love, Chair of the ACVM Examination Committee and Chris Hayhow, ACVM Secretary-Treasurer, attended the ABVS Job Analysis Workshop. We discussed 1) what a job analysis is, 2) how to use a job analysis, 3) why a job analysis is critical (it provides a legal defensibility for an examination program), 4) when a job analysis is needed and, 5) what type of information is collected. Dr. Brenda Love and the ACVM Examinations Committee will now use the information to evaluate our examination. During the ABVS annual meeting on February 24-25, 2007, the ACVM's annual report was reviewed and approved. The ACVM was commended for their efforts to enhance candidacy for ACVM diplomate status. During 2006 the AVMA conducted an economic survey of Board certified veterinarians. The purpose of the survey was to evaluate the benefit of board certification. The outcome of the survey should benefit our college.

Office of the Secretary-Treasurer

Dr. Chris Hayhow, 30705 West 84th Circle, DeSoto, Kansas 66018

Phone: (913)-894-0230, FAX: (913)-894-0236, E-Mail: chayhow@biomunecompany.com

Elections

Included with this newsletter is information on candidates for the ACVM Board of Governors'. There are six (6) candidates for the three (3) positions available on the board. In addition, information is provided on the candidate for ACVM Honorary Diplomate for 2007, Dr. Glenn Songer. Please provide your response to the ballot to me via email at chayhow@biomunecompany.com. The deadline for returning your ballot is April 15, 2007.

ACVM Board of Governors' Candidates for 2007

Charles (Sandy) Baldwin

Graduated from the University of Massachusetts with a BS in Animal Science. He matriculated into the New York State College of Veterinary Medicine and upon graduation spent six years in mixed animal practice. At that time, he returned to Cornell and obtained a Masters and PhD in veterinary virology. He was then employed by Oklahoma State University, College of Veterinary Medicine, where he was in charge of the virology and serology sections at the Oklahoma Animal Disease Diagnostic Laboratory for an additional six years. It was while he was at Oklahoma that he became a member of ACVM in 1990. Finally, he joined the College of Veterinary Medicine, University of Georgia at the Veterinary Diagnostic and Investigational Laboratory. He has been the head of the virology and serology section for fifteen years. In addition, he has served as Director of the Diagnostic Laboratory for the past seven years.

ACVM Vision Statement

Never has veterinary microbiology been as important to everyone world wide as it is now. We can read daily accounts of avian influenza, bovine spongiform encephalopathy, Johnes Disease, food-borne illnesses such as salmonellosis, monkey pox, anthrax, West Nile Virus, Eastern Equine encephalomyelitis virus and the list goes on and on. It has been mentioned that 61% of the human diseases are zoonotic. We, as a college, need to act on this increased awareness. Every day we hear about homeland security and the potential effects of bio-terrorism. We need to promote ACVM certification. Make it become a mandatory step in a microbiologist's march towards tenure in academia,

as the pathologist's have done.

This will take education on the College's part as to the necessity of having access to our Diplomates. We must advertise who we are, what we can offer and why we are so very important to the public health sector. We need to be part of the future policy making teams as these teams are formulated. The only way to become an integral part of this policy making is to inform everyone of our capabilities and what being a part of ACVM means. This in turn means higher visibility at all conceivable venues (CRWAD, AAVLD, etc), conducting workshops when we can.

It is an honor to be considered for the Board of Governors and I would do my best to promote the College if I am successful. Thank you for this opportunity.

Walter J. Bruyninckx

I am honored to be nominated to stand for election to serve on the Board of Governors of ACVM because I am proud to be a diplomate and wish very much for the College to flourish and succeed in its mission. I received my formal training from the University of Gent Belgium (DVM in 1974 and PhD in 1987) and became certified shortly thereafter (1989 and 1991). My research interests have carried me from the University of Oregon Health Sciences Center (Oxygen toxicity) to National Jewish Hospital in Denver (mouse macrophages) to Colorado State University (chemotaxis and phagocytosis of neutrophils of domestic animals). For the last 14 years I have been a full-time teacher at Hanover College (Hanover, Indiana) in microbiology, immunology, cell biology, and general biology courses.

ACVM Vision Statement

I like to actively support the mission of ACVM. We have to keep encouraging colleagues to pursue their interests in microbiology and infectious diseases, foremost to maintain humane treatment of animals, keep food production economic, but also to understand zoonoses, and be ready for new emerging and old reemerging infections. We have increasing responsibilities in keeping the human food supply safe, slow the development of antimicrobial resistance and the members are well placed to have important roles in the defense

Office of the Secretary-Treasurer

Dr. Chris Hayhow, 30705 West 84th Circle, DeSoto, Kansas 66018

Phone: (913)-894-0230, FAX: (913)-894-0236, E-Mail: chayhow@biomunecompany.com

against bioterrorism. We have a duty to make membership attractive and entry fair, attainable, and meaningful.

Harry W. Dickerson

I received my veterinary degree in 1977 at Pretoria University in South Africa and practiced large and small animal medicine and surgery in South Africa and the U.S. until 1980. I entered graduate school at the University of Georgia (UGA) and completed M.S. and Ph.D. degrees in microbiology in 1982 and 1985, respectively. Following two years of post-doctoral training in the UGA Department of Genetics, I joined the faculty of the Department of Medical Microbiology and Parasitology (now the Department of Infectious Diseases) in the UGA College of Veterinary Medicine in 1987. I attained the rank of professor and assumed the administrative duties of associate dean for research and graduate affairs in 1997, a position in which I continue to serve. My research is in the areas of molecular parasitology and comparative immunology.

ACVM Vision Statement

I have been a diplomate of the ACVM since 1985, have served two previous terms on the Board of Governors, and have had the additional honor of serving as Chairperson of the Board of Governors in 1997. I feel as strongly as ever that veterinary microbiologists are in a position of remarkable relevancy to our profession and society. Emerging and re-emerging infectious diseases, threats of agri- and bio-terrorism, opportunities in microbial ecology, and unprecedented scientific advances in all areas of microbiology in the post-genomic era make this an incredibly exciting time to be a veterinary microbiologist. Having been a veterinary academic for most of my career, my vision encompasses the scholarship of teaching, research and service. Our colleges of veterinary medicine are facing real challenges with regard to filling positions vacated by retiring veterinary microbiologists. Industry faces the same issue. Thus, in my opinion there is no greater issue facing the ACVM than that of helping to ensure a pipeline of qualified and dedicated researchers, teachers and diagnosticians in veterinary microbiology. I am prepared to work toward this end if selected to serve on the Board of Governors.

David K. Meyerholz

Dr. Meyerholz received his DVM from Iowa State University's College of Veterinary Medicine in 1994 and went into private mixed-animal practice. His interest in science and research lead him back to ISU for a MS in Veterinary Microbiology during which time he worked on early invasion and novel cytotoxin production by multiple antibiotic resistant *Salmonella enterica* serovar Typhimurium DT104. He then joined a combined PhD/residency program in the Department of Veterinary Pathology. His PhD involved studying Paramyxoviridae infections with emphasis on a lamb model of neonatal/preterm RSV infection. In addition, he received an NIH K08 post-doctoral award to characterize novel therapies (VEGF) for perinatal RSV infection. Currently, he is an Assistant Professor of Pathology at the University of Iowa's Carver College of Medicine and Director of the Comparative Pathology Laboratory. His research interests involve viral infections (SARS-CoV, Influenza, RSV, etc) of the lung and on novel therapeutics for pulmonary delivery. He is a Diplomate of the ACVP (2005) and ACVM (2006).

ACVM Vision Statement

The scaffold for the ACVM vision should be composed of foundational pillars such as growth, visibility and expertise. *Growth*. The college should further strive to reach out to students and student groups to educate them on what the college has to offer. Representative members should be able to articulate a clear and concise message to future/eligible applicants as to the benefits that coincides with ACVM certification. *Visibility*. The ACVM must endeavor to be seen/heard in the national/international spotlight through educational presentations, seminars, and interactions. This exposure should be widespread in scope to include meetings/publications from diagnosticians, to microbiologists, to investigators of animal disease and animal models of human diseases, regarding zoonotic and emerging pathogens, and in veterinary education. *Expertise*. The ACVM should accentuate and highlight their member's strengths and expertise. Diplomates with outstanding research, educational or scientific contributions should be noted and recognized. Introduction and identification of these representative members into the national spotlight - from meetings to journal

Office of the Secretary-Treasurer

Dr. Chris Hayhow, 30705 West 84th Circle, DeSoto, Kansas 66018

Phone: (913)-894-0230, FAX: (913)-894-0236, E-Mail: chayhow@biomunecompany.com

articles to news interviews – will accentuate awareness as to the expertise and resources that the ACVM offers. These three foundational pillars partially overlap in function, but in my view is the necessary emphasis for future recognition and success of the ACVM.

Rebecca P. Wilkes

I received a Bachelors of Science in Biology from Union University in Jackson, TN in 1996. I graduated from the College of Veterinary Medicine at the University of Tennessee in 2001 and decided to pursue career options other than private practice. I started my PhD program in August 2001 in Comparative and Experimental Medicine at the University of Tennessee. I have called Tennessee home all my life. I grew up in Memphis, but I have fallen in love with the mountains of East Tennessee, and I welcomed the chance to stay in Knoxville at least a few more years. After completing all my required courses, except one, I could not decide what I wanted to do with my life, so I took a couple years off from my PhD program for a post-doctoral position in the Clinical Virology Laboratory at UT. I was able to work for Dr. Melissa Kennedy, who taught me everything I know about diagnostic virology. This position allowed me to discover my interest in diagnostics, especially molecular diagnostics, and this experience was key for me for becoming certified in the virology subspecialty in December 2005. I did return to my PhD program in 2005 and just completed my research, in which I tested the feasibility of using RNA interference to prevent feline herpesvirus infection *in vitro*. I plan to graduate in May, 2007.

ACVM Vision Statement

I did not learn anything about ACVM until I was already in my PhD program, but it would have been helpful to know about this organizational body and possible career opportunities it provides in my first year of vet school. Unfortunately, the course coordinators at that time, for the courses I enjoyed the most in vet school (virology and immunology), were not ACVM diplomates. However, that problem has been remedied, because Dr. Melissa Kennedy is in charge of those courses now. So, all of that to say, that ACMV needs more of a presence in the vet schools, at least that was the case at UT. Veterinary students need the opportunity early in their training to learn about career options other than private

practice and board certifications in clinical specialty areas. Those of us which are more suited for laboratories need to realize that there is specialty certification in the areas that interest us. Veterinary students who have an aptitude for microbiology should be encouraged to pursue that career path and ACVM certification. It was made very clear to us as third year vet students that salaries for graduate veterinarians are not being increased at the rate that veterinary education costs are, and with that trend, new graduates would eventually have difficulty paying their student loans. What a bleak message, especially for individuals who probably made sacrifices in our personal lives and had gotten into debt to pursue a noble career. I know I did. It is my understanding that board certification makes one competitive for higher paying jobs, and that is the incentive to pursue certification. This message is attractive for new graduates. It will not be possible to increase veterinary students' awareness of ACVM unless there are enough diplomates to fill the microbiology positions in the veterinary schools, and that starts with helping the individuals who plan to become board certified properly prepare for the exams. There have obviously been gains made in this area, since we have eight new diplomates this year. However, there were only two of us in 2005, and I believe it should be every member's responsibility to contribute to the exams to keep them as current and relevant as possible, but still challenging enough for new diplomates to have properly earned their membership in ACVM. We cannot make the veterinary medicine community at large aware of our expertise unless there are enough of us to fill the types of positions which could use our expertise. I obviously have not been involved with ACVM very long and am not established in my career yet, but I consider these things positive. As a fairly recent graduate and just about to get started in a veterinary microbiology career, I can offer insight into current graduates' concerns and a fresh outlook on issues facing the ACVM. I would be honored to serve the ACVM as a member of the Board of Governors.

Kyoung-Jin Yoon

Dr. Kyoung-Jin Yoon, a Korean native, completed the DVM in 1985 and MS in 1987 at Seoul National University in Korea. He was an Adjunct Instructor in the College of Veterinary Medicine at the same university until 1988 and then served the Korean Army as a veterinary officer where he experienced

Office of the Secretary-Treasurer

Dr. Chris Hayhow, 30705 West 84th Circle, DeSoto, Kansas 66018

Phone: (913)-894-0230, FAX: (913)-894-0236, E-Mail: chayhow@biomunecompany.com

public health and comparative medicine. After discharged from the military service, he briefly took a job at the Veterinary Science Research Institute of Seoul National University as a research fellow until he came to the US for advanced study. Dr. Yoon received his PhD degree in Veterinary Microbiology from Iowa State University in 1995. Since then, he has been a faculty member in the Department of Veterinary Microbiology and Preventive Medicine and then the Department of Veterinary Diagnostic and Production Animal Medicine at Iowa State. Currently he holds professor rank. In addition, Dr. Yoon has been serving as diagnostic virologist and headed the Virology and Molecular Microbiology Section at the Veterinary Diagnostic Laboratory. He was boarded by ACVM in 2000. Dr. Yoon's educational and research interests have been on viral infections of livestock particularly pigs and cattle. The main focus of research is the pathogenesis, diagnostics and prevention of viral diseases.

ACVM Vision Statement

We are living in a very rapidly changing world. There is no discernable difference in the world of infectious agents and our world. As a result, we have been seeing the midst of emerging and re-emerging of infectious diseases. This 'chaotic' nature would continue as it is a survival game to microbes. If so, it stresses the importance of preparedness for unpredicted events to animals in order to secure food supply and minimize zoonotic threat if present. This brings up the need for a good pool of well-trained microbiologists with leadership. In my point of view, ACVM board certification is certainly a proof of good training and proficiency in application of science and basic knowledge to the clinical situation. Historically ACVM maintains high standards for certification. I think this tradition must continue. Unfortunately though, we at ACVM all face the decline in the number of applicants (particularly young generation), not to mention a high rate of failing in board certification. I think of two reasons for this. One reason would be suboptimal recognition of ACVM board certification by academia, the health profession and industries in comparison to board certification in other specialties such as pathology or clinical science. It could be corrected if we broaden the exposure of ACVM. In an attempt to increase the awareness of ACVM and board members, I strongly believe we should actively pursue the alliance with other veterinary

organizations, commodity groups and public health sectors and also include ACVM activities in their meetings. The other reason would be the lack of a formal/uniform training program or guideline for board certification. To keep the value of board certification, the proficiency and knowledge of members in veterinary microbiology and infectious diseases should be demonstrated to others and hopefully the public too. I don't believe this can be accomplished without a very rigid and solid training program led by board members. If we can tackle these 2 areas effectively as briefly stated above, I believe we should be able to recruit very talented, qualified members in no time, which sustains ACVM and also serve our country's needs well. That would be my goal of serving on the Board of Governors. To this end, I appreciate the honor of being nominated for the Board and hope that I will have a chance to enthusiastically pursue the goals I stated above.

Candidate for Honorary Diplomate

Dr. Glenn Songer

It is with pride and honor that I nominate Dr. J. Glenn Songer for honorary diplomate status in the American College of Veterinary Microbiologists. Our professional interactions began in the mid 70's as Dr. Songer worked on his Ph.D. and served as instructor in the Department of Veterinary Microbiology and Preventive Medicine. I was in the early years of my career at the Iowa State University Veterinary Diagnostic Laboratory, and we shared a common bond, just as we do 30 years later, in excitedly exploring the world of veterinary bacterial pathogens.

Dr. Songer accepted a faculty position at the University of Arizona in 1977 where he remains today as Professor of Veterinary Science and Microbiology. Even though many miles separate our day to day existence, we have sustained a close professional relationship and continue to explore common research and diagnostic interests. It is truly a privilege for me to enumerate several of the major accomplishments of this outstanding scientist and scholar.

We are all inspired by Dr. Songer's ability to sustain a productive and progressive cutting-edge research team. He has distinguished himself as a leader for investigating clostridial diseases in domestic

Office of the Secretary-Treasurer

Dr. Chris Hayhow, 30705 West 84th Circle, DeSoto, Kansas 66018

Phone: (913)-894-0230, FAX: (913)-894-0236, E-Mail: chayhow@biomunecompany.com

species. His work with pathogenesis, virulence factors and genetic characterization of *Clostridium perfringens* and *Clostridium difficile* in swine and other species is unparalleled and has served to establish guidelines for diagnosis, intervention and control of these infections. The livestock industries of the U. S. and the world have benefited greatly from the basic and applied research orchestrated by Glenn Songer. His extramural funding record along with the immense number of refereed publications and honors from peers reflect the impact and strength of his research career. Dr. Songer is also recognized for his ability to publish and present research discoveries in a timely fashion. It is appreciated when a scientist can design experiments well, carry them out in a defined timeframe, apply the correct statistics, interpret results accurately, and report the details in appropriate forums and publications. It must be added that Glenn Songer is also a dedicated and impassioned mentor to his graduate students, many of whom have garnered positions of high stature in their personal careers.

Dr. Songer has distinguished himself in the classroom as a creative and caring instructor who is appreciated and respected by his students. He is skilled at optimizing the learning environment for undergraduates and graduate students with his calm demeanor, creativity, quiet but enthusiastic delivery style and immense knowledge; he also mesmerizes audiences at meetings with his dry humor and clever presentation of research data and investigational techniques. Another important aspect of his career is mentoring and advising undergraduates and special program students at the University of Arizona.

Last but not least, Dr. Songer is an outstanding veterinary microbiologist who has supported and contributed to the community throughout his career. We have consulted one another on a regular basis and share many of the same philosophies, priorities and values for conducting quality diagnostic service in a timely fashion. Dr. Songer has been relentless in his pursuit of integrating basic research with the world of practical applications. This is reflected in the fact that many of his discoveries have led to techniques, data and information of great use to diagnosticians, practitioners, producers and industry scientists.

Dr. Songer is an exemplary academician who has

developed, communicated and implemented new ideas and methodologies through research, teaching and outreach. His methods of validating and documenting scholarship have brought him national and international acclaim in the field of Veterinary Microbiology. He is exemplary in thought, word and deed and his professional excellence will continue to generate respect and thanksgiving among those who are beneficiaries of his extraordinary talents and human qualities.

I hereby recommend that you bestow Dr. J. Glenn Songer with Honorary Diplomate status in the American College of Veterinary Microbiologists.

Respectfully submitted,

Lorraine J. Hoffman, Ph.D. and Honorary Diplomate, ACVM
Professor of Veterinary Diagnostics and Production Animal Medicine
Veterinary Diagnostic Laboratory, College of Veterinary Medicine
Iowa State University
Ames, IA 50011

ACVM Biosecurity Task Force

The **mission** of the American College of Veterinary Microbiologists (ACVM) Biosecurity Task Force is to assist local, state, and federal officials in prevention of, response to, and recovery from infectious diseases, which threaten food security or public health. The accidental or intentional introduction of these diseases has the potential to devastate food security and/or public health in the U.S. The ACVM Biosecurity Task Force is a group of ACVM Diplomates and Honorary Diplomates who:

- Are experts in microbiology and infectious diseases;
- Have received training in the Incident Command System; and
- Have educational resources related to bioterrorism, agroterrorism, zoonotic diseases, and foreign animal diseases.

The Task Force members are volunteers who will strive to be available when contacted by local, state, or federal officials to lend their expertise to assist in preventing, responding to, or recovering from an

Office of the Secretary-Treasurer

Dr. Chris Hayhow, 30705 West 84th Circle, DeSoto, Kansas 66018

Phone: (913)-894-0230, FAX: (913)-894-0236, E-Mail: chayhow@biomunecompany.com

infectious disease emergency.

ACVM Biosecurity Task Force members could share their expertise in the following ways:

- Present awareness education seminars for health professionals or the public on bioterrorism, agroterrorism, zoonotic diseases, or exotic animal diseases.
- Advise on infectious agent detection and control prior to, during, and after a public health or animal health emergency.
- Consult with and advise emergency response safety officers before and during an infectious disease emergency.
- Assist in responding to media inquiries and in education of the public regarding an infectious disease event.

Officials in the USDA, the CDC and the DHS will be told about the ACVM Biosecurity Task Force and the willingness of its members to assist with prevention of, preparation for, response to and recovery from infectious disease emergencies. State Veterinarians, Public Health officials, and Homeland Security officials will also be notified of the existence of the ACVM Biosecurity Task Force.

The Center for Food Security and Public Health (CFSPH) at Iowa State University will provide task force members with resource materials through the CFSPH website (<http://www.cfsph.iastate.edu/>) which include:

- Power point presentations and fact sheets on all bioterrorism agents and high consequence livestock pathogens.
- Handouts for use with various audiences
- Public speaking handbook

All ACVM Diplomates and Honorary Diplomates are eligible to serve on the ACVM Biosecurity Task Force. To become a Task Force member, ACVM Diplomates must:

- Complete level 100 and 200 training in the Incident Command System through a self-study course on CD-ROM prepared by the USDA.
- Be willing to have their name and contact information on a publicly available database, and strive to be available when contacted by local, state, or federal officials to lend their expertise to assist in preventing, responding to, or recovering from an infectious disease

emergency.

- Become familiar with the training materials available for their use.

ACVM Diplomates who are willing to become ACVM Biosecurity Task Force members should contact James Roth, President, ACVM Board of Governors. A CD with the USDA level 100 and 200 Incident Command System training will be mailed to you. After completion of the training, mail or fax a copy of the certificates you will receive to Dr. Roth. You should sign the certificate, but it does not need to be signed by a supervisor. Your entry from the ACVM Membership Directory will be added to the list of members of the ACVM Biosecurity Task Force. You can check your information in the membership directory on the ACVM website: <http://www.vetmed.iastate.edu/ACVM/>

New Directions

Currently the Board of Governors is considering changes that will affect continuing education and the professional recognition of ACVM. If any diplomates have any suggestions or comments please contact one of the ACVM Board of Governors members or one of the ACVM officers.

ACVM on the Internet

Please note the new ACVM website address is www.vetmed.iastate.edu/acvm. The site contains meeting minutes, the history, goals, directory, Constitution, By-laws, instructions for potential

Office of the Secretary-Treasurer

Dr. Chris Hayhow, 30705 West 84th Circle, DeSoto, Kansas 66018

Phone: (913)-894-0230, FAX: (913)-894-0236, E-Mail: chayhow@biomunecompany.com

candidates and an application form. All members should review the updated website. Any suggestions for changes are welcome.

2007 Board Meeting in Washington, DC

All ACVM Diplomates are invited to attend the ACVM Board of Governors' meeting to be held in conjunction with the AVMA annual meeting in Washington, DC. The Board of Governors' meeting will be held at 9:00 AM on Sunday July 15, 2007 at the JW Marriott Hotel. The agenda and exact location of the meeting will be placed on the ACVM web site as soon as it is confirmed and available.

2007 CRWAD Meeting in Chicago, Illinois

Please plan on attending the ACVM Annual and Board of Governors' meeting, which is scheduled for Sunday, December 2nd, 2007 at the Chicago Marriott Downtown Magnificent Mile Hotel, Chicago, Illinois. It will be held at 9:00 AM. The agenda and location of the meeting will be placed on the ACVM web site as soon as it is confirmed and available. Remember to support the ACVM symposium, which will be held on the afternoon of Sunday December 2, 2007. The ACVM banquet will be Monday December 3, 2007 at a location to be determined. Additional information concerning the banquet will be provided in the future. We hope to see you there!

Dues Status

Dues are now \$80 per year. They are due by July each year. Due to the transition to a new Secretary-Treasurer we are currently reviewing the dues status of all ACVM members. If you have not paid your dues for 2007 or for any past year(s) please submit payment to my attention as soon as possible. Please make remittances payable to ACVM by check drawn on a US bank or by international money order and mail directly to me. *Emeritus or honorary diplomates do not need to pay dues* (donations are always welcome). Emeritus diplomates can vote, but not honorary diplomates. Please note that beginning with dues for 2007, the

fee increased from \$30 to \$80 per year. All diplomates paid in advance are requested to pay an extra fee to assist the college in achieving our ambitious goals.

Suggestions and Corrections

For additional information or to provide suggestions, please contact:
